Subject: manuscript by Schroeter and Connolly and others
Attachments: Conolly Formaldehyde Ms Clearance Pkg 130712.pdf

Hi Ravi,

Boy...you really know how to time a vacation :-)

In case you haven't seen your email, I have attached a manuscript that Connolly is a coauthor on about dosimetry in the respiratory tract incorporating info on endogenous formaldehyde in epithelial cells.

Big surprise. The manuscript has been cleared and the authors have likely submitted it although Bob asked Rory to request that they delay for a week so NCEA can review. Gina/Bob/David requested that Paul White and Wueh Sueh review it in your absence.

Thought you'd want to know. Regards, Barbara
